federal Trade Commission
Washington, DC

Gentlemen:

We **are** concerned about the upcoming move to make the "Made in the USA" labels represent the item to be less than 100% **actually made in the United States**. This is **pure fabrication.. a lie**. We hold that the labels **should accurately** represent what they are. Nothing less than items **actually 100%** made in the **USA** should state that **it is made in the USA**.

Thank you for your consideration in this matter.

Sincerely,

The Evergreen Academy
