I 24

To: The Federal Trade Commission

Regarding: The proposal to weaken
standards for "Made in USA" claims
by manufacturers.

It is my opinion that if
a label says "made in USA"
it should be 100% made in the USA
not part here and part
in CHINA or some other country.

I think that would be
okay for the people who
value the "MADE IN USA" label,
like my husband and I do.

I would like to hear what
happens to this proposal
and who was responsible
for passing it so I know
who not to vote for.

As I said before we value items we can buy that are made in the USA and it is hard enough to find don't make it even more difficult for the consumers to buy "made in USA" items by weakening the standards.

I thank you for your time and consideration of my thoughts.

Sincerely,

Patty Carril

62234

(618) 385-1520

P.S. I have enclosed a self-addressed stamped envelope for you to send me the results of the proposals.

Thank you.
