Subject: Contact lens prescriptions  
Date: March 5, 2004

----- Original Message Follows -----

This note is in response to the proposal to limit the ability of consumers to have access to contact lens prescriptions after eye exams. I oppose any effort to restrict the ability of consumers to choose where they will purchase their contact lenses or eye glasses. As is common in medical practice generally, eye doctors should provide prescriptions and consumers should decide where to have prescriptions filled.

Sincerely,  
Paige Schneider
