

My three children are contact lens wearers and I have had so many problems trying to get RX's released to me. It's totally unfair that a doctor cannot give me my RX for my children so I can go elsewhere to purchase lenses at a much cheaper price. Sometimes the price difference can be up to 60% off. You do the math 3 children x 12 boxes per year it comes to a substantial savings. Please do the "sensible" thing and make it mandatory for these overpriced doctors to release my children's RX to me. Thank you
