Subject: I want my prescription

I want my prescription from my doctor at no additional cost and with no obligation to buy anything from the doctor/office that I go to get my eyes checked. My medical doctor gives me a prescription when I need one, with no additional charge and I can take it to any Walgreens, Osco, Target etc. that I want to get it filled (or wherever my insurance company has a deal). I get my eyeglass prescription and can get eyeglasses anywhere I want with it - the same should be true for contacts.

Thank you
