Subject: My Consumer Rights

As a consumer of contact lens it is my right to purchase my lens where ever I want. It is not the Dr. right to tell me where I must purchase. Years back when my lens were hard the cost was \$100.00 to \$200.00 dollers. What a rip off that was. I want to shop for what ever I shop for where ever I want. I have worn contacts for 35 years, so I know what lens were then and what they are now. My daughter in Ohio had an exam. and and the lens for \$13.00 total with her insurance from Stabucks Coffee Co. What a deal that was. I suspect that the eye Dr. years back became very wealthy with contact users. I would think the lens actual cost is no more then \$2.00. If that -- to make. Soooo let me buy them where I can get the best deal. Thank You
