**Subject:** New Law

I support the new law that gives the contact consumer the rights to a copy of their own prescription. It is important to me as a contact consumer to have the right to purchase my contacts from a different supplier and more important, a cheaper supplier, than to have to order only from my doctor. I have always received a copy of my prescription from my eye doctor, so I currently have the option to purchase my contacts from a cheaper supplier, but I would be angry to know that my rights had been taken away.

I, as a contact consumer, am unfortunate enough to not have perfect eye site, and would like to know that I still have the right to a choice! Do Not Take My Right Away!!

Thanks,

Kristie Morse
