Subject: Right to contact lens prescription, free of charge

My name is Patricia Claney, and as a contact lens wearer, it is crucial for me to be able to obtain my contact lens prescription from my eye care professional, free of charge. I live quite a distance from any city, and I would have to take a day off from my job as an elementary teacher in order to go to "the city" and pick up contact lenses. In addition, most eye care professionals charge a great deal more than "discount" places.

I really enjoy having the ability to choose both the best eye care professional I can AND choose an affordable place to purchase my contact lenses, where they can be shipped to my home, usually free of charge.

Thank you for your time.
