To whom it may concern. The proposal before you to require people to wait for contact lenses is absurd. These are not guns, they are contact lenses. Who is looking out for the patients? This is typical big-business, big-brother crap. I hate having my prescription being held hostage just so I can pay a criminally HIGH rate for lenses from my doctor's office. I have had this experience with two of my last three eye doctors and I will keep looking until I find one who can deal with shopping-savy patients. I do vote.

Thank you for your consideration.
