Hi.

I am glad to hear about the new regulations that are being formed in the prescription of contact lenses from Optometrists. However, I would like to express my concern for the regulation concerning patients having to wait days for their prescription contact lenses. Being in music ministry, I travel quite often and it has been very important to me that, in times of need, I can place and receive my order within 24 hours. Whatever can be done to preserve this right I would appreciate.

Thank you for your time.

Mrs. Rose
