The new legislation regarding the rights of contact wearers means a lot to me - a 23 year contact wearer. I've always insisted on having my prescription in hand so that I can compare prices and get the best buy. Although the doctor makes it difficult, tries to guilt me into buying lenses from him, I always give him the opportunity to try and match the deals I get at other places. This legislation will be an excellent tool in legitimizing our stand on the issue of our rights.

Thank you  
Joanne R.Hench
