**Subject:** Re: Protect Your Rights as a Contact Lens Wearer

Contacts are extremely important in my daily life because without them I am legally blind. I can not function as a person are pretty much useless. Having the convenience of receiving contacts the next day in a case of an emergency is imperative. If the new law requires consumers to wait days in order to receive their lenses the repercussions can be disasterous. I know I could not go to work and would have to stay home if I did not have lenses to wear. This would cause me to lose income and since expenses are not going down in this country this could lead to serious economic problems. Every little thing has an affect on the way of life as we know it today.

thank you
