Subject: CONTACT LENSES

I wear contact lenses, go to a reputable eye doctor and pay dearly for the examination and ultimate prescription. I agree with the ruling that my eye doctor must provide a copy of my prescription so I can purchase my lenses wherever I want at the most competitive price I can find. Why would the FTC propose a rule to force me to wait DAYS to get my lenses?

As an American I feel we are getting more government in areas that we don't need government, and I STRONGLY OPPOSE the proposal to require a waiting period before I can get my contact lenses! I cannot justify any rationale to support this proposal!
