I am a contact lense wearer for the past 24 years and with the cost of everything going up, it is important for me to buy lenses where I can get the best for the least amount. I go for checkups regularly and would like to be able to buy my lenses at places like 1800 contacts because I know while I am getting the best quality I am also getting the best price. Even with a contract with my eye care doctor, I am paying more than when I buy them at 1800 contacts.

Please fight for us to have the right to our prescriptions and buy lenses where we want.
