To whom this may concern,

It is very important for me as a contact wearer to be able to obtain my contact lens with convenience, fair pricing and good quality. I have been purchasing my lens from 1800Contacts for the last 5 years and have not had any problems. When I originally tried to get my Rx from my eye doctor, he wouldn't give it to me. Being in the health field, I knew I was entitled to my medical records. I pressed him and won. I knew my rights, but most people do not and Eye doctors count on that.

He was wanting me to buy my contacts only from him at 3 times the price I was able to get them on 1800contacts for. I am in full support of the Fairness to contact lens consumers act of 2003.

Thank you for taking the time to read my letter.

Sincerely,  
Karen Willis  
Massachusetts
