Subject: Contact Lens Rule, Project No. 411002

I absolutely support the law requiring that my eye doctor gives me a copy of my contact lens prescriptions. I may buy some contacts from my eye doctor, but want the freedom to purchase my contacts at the best price. It has been difficult to get my prescriptions from my doctor in order to purchase contacts at another location.

Contact lens wearers should have the same freedom of choice as eyeglass wearers. Automatic right to a copy of their prescriptions.

Sincerely,
Skip Gumble
