Subject: contact lenses

Dear FTC,

I am writing to you concerning contact lens rules. As a graduate student I often do not have the time or money to worry myself with reordering contact lenses through my doctor. They are very expensive and are only open during working hours, when everyone is busy. I get a regular checkup every year. I buy my contacts off 1800contacts because they are cheap and easy. Why are you even trying to regulate this? Can we overdose on contacts? If we order incorrectly, can we sue the government for not regulating this properly? Come on now...give us our FREEDOM regarding contacts and use our tax dollars for something good that really needs regulating.

Sincerely,

Brandi Blaisdell
