Subject: Fairness to Contact Lens Consumers Act of 2003

I have been a contact lens wearer for many years. I have often experienced difficulty in getting copies of my prescription from various optometrists who have examined my eyes. Members of my family have had similar difficulties over the years.

Accordingly, I support recently enacted federal legislation, and I oppose any effort by optometrists to put burdens on this new right for the benefit of optometrists and to the detriment to consumers.
