Subject: Support Contact Lens Law

I have been a contact lens user for over 30 years. And I support the right to getting my contact lens prescription from my "Eye Specialist" and purchasing my lens by mail. Contact lens are expensive and since this is not a covered item under insurance coverage, it is paid out of my pocket. I have the right to seek, find, and use "less" expensive alternatives. My eye specialist who prescribes the strength of those lens has already been paid for his services, but I own the right to the prescription.

I support the need for eye care providers to cooperate and comply with Federal Law by providing my prescription information and keeping competitive pricing as an option for contact lens users. Thank you!
