Subject: support of law

To whom it may concern:

I support a law to give consumers the automatic right to obtain their contact prescription. I had to sign a release for my records to obtain my prescription from my eye doctor since my doctor did not provide it to me (although he told me it was my contact prescription, when I tried to use the prescription I was informed that it was actually my EYEGLASS prescription - my eyeglass prescription was written TWICE to me). I spent a lot of time and effort obtaining my contact prescription.

Thank you,

Angela J. Shutty
