I'm writing to express my support of the new Contact Lens Law. As a full-time working parent, I often find it difficult to schedule office visits during the day. And, unfortunately, my eye doctor's office and most that I know of in my area are only open during regular business hours. To be required to obtain my contacts from only my eye doctor would cost me and my employer precious work time. By easily accessing my prescription, I am able to order, make payment and receive my contacts from my home without losing any work time.

I hope you will consider my situation, as it is that of so many others as well.

Thank you.

Angel L. Spencer
