**Subject:** Support New Law

I am writing to say that I am in support of the Fairness to Contact Lens Consumers Act of 2003. As a military spouse who is constantly moving, I don't have the convenience of always seeing the same eye doctor. I need to have possession of my own prescription so that I can buy my contacts from wherever my current place of residency may be. In the last year alone, we moved four times. Please enforce this act so that other people within the military community like myself have one less thing to worry about. Thanks for your support.
