Subject: Spyware Workshop - Comment

Hello. My name is Ian Gacek, and I belong to PcPitstop. I want to express some of my feelings about Spyware.

1. I feel that I'm violated, that people are putting files that can possibly harm my computer, onto my computer without asking.
2. I feel that it slows down my computer
3. I feel that this is an intrusion of my privacy
4. I also feel that spyware/adware should be illegal, because its an intrusion of people's privacy, and puts files on your computer without asking.

Sincerely,
Ian Gacek
