Subject: Spyware Workshop - Comment, P044509

Someone needs to do something about the kind of filth that invades my home. I get over 250 spam's a week. Most of them are porn. complete with graphic pictures. I have a spam program that puts this mail in the delete box. The problem is I can still see it in the delete box when I delete it from there. Anyone can go to my delete box and see these porn. spam's. No one uses my computer to visit porn sites. I do not know why I get all this filth. I have a right to be protected from unwanted spam. Someone needs to step in and stop this the same way the do not call list does. The do not call list is working great. I rarely get a call I do not want.

Sincerely,
Patricia Hanson
