Conversation: Spyware  
Subject: Spyware

Spyware is nothing more than an underhanded, scheming invasion of my privacy, and is nothing less than spying. It is the same as telephone solicitors calling at all hours to interrupt my privacy and irritate me trying to sell something that isn't worth the money, otherwise it would sell itself!

If the government can't, or in this case, probably won't because of special interest groups, put a stop to it, then no one will be surprised because we are used to politicians and their flunkies taking money from those groups.

Please do your job, just simply do your job, and stop these crooks and spys (and they are both!) from playing Big Brother!!

Thank you!  
Jim Skinner
