Subject: Spyware Workshop - Comment, P044509

I have been inundated with spyware, I currently have 4 programs downloaded on my computer to get rid of it and my server just took action to rid my email of it. However I still get at least 4 to 6 spam letters a day. The spyware and spam have brought numerous viruses to my computer, in which I had to have a licensed technician spend 3 hours restoring my computer to working condition. Spam and spyware have brought to my computer the most vile, invasive pornography. One day the porno sites waterfallled till I had approximately 30 windows of porn. As I deleted one another would come up I couldn't keep up with them all. Every kind you can imagine. I would no more let my grandchildren use my computer than fly. My grandchildren were less than 10 years old at the time. If our law enforcement people go after pedophiles why don't they go after the porn sites which children can view? Please address these issues as soon as possible. Spyware and Spam are ruining computers>
