I don't understand why they havnt been sued for putting adware spyware on peoples computers.
To me looks like there more than less hacking and under mineing the privacy act of peoples rights.
Yes america is free But does it give peple rights to follow people on the streets ?
Do we have the right to stock people ?

I SAY NO!!!

ALSO:

Companies that put spyware/adware on your pc witch also screws up the pc (like mine so many times before)

I had to redo my pc Cause what it has done

IF we puyt adware Spyware on there pc its illegale act if they do its alright?

Can we bug there telephones Can we look through thert pc , Track them ?

There should be a law or a bill against this terroist acts .

Least to me seems that it is .
