I get raped and robbed every day.
The crime scene: my PC.
The predator: Spyware.

Who are these people that shamelessly take over and use my PC to their own advantage? Who dictate how my computer runs (or misbehaves, I should say) and already have cost me over \$400. in repairs and new equipment due to computer crashes? I am angry.

Where is the government to protect us from such coward and sneaky criminals? It should be a no-brainer: spyware needs to be declared illegal.

Sincerely,
Christine
