Subject: Spyware Workshop - Comment, P044509

Many of the "spyware" and "adware" companies complain that any legislation against the practice would be an infringement of THEIR rights. It seems to me a bit ironic that they can use MY bandwidth to download programs to MY computer that take up space on MY disk and report personal information about ME back to their databases--all without my knowledge--and then whine that somehow it's their rights that are at risk!
