I would urge the commissioners to do everything within the law (or to pass new laws!) to stop the proliferation of spyware and adware.

Adware is the same as if someone took control of your TV and changed the channel to what they wanted you to watch.

Spyware is no different than someone reading your personal private mail. This would absolutely not be tolerated!

Again, I urge the commissioners to do everything within their powers to stop this illegal intrusion into the privacy of American citizens.

Thank you.
