

Wed 5/19/2004

Good Evening,

My name is Floyd G. Croswait and I own a Computer Shop on the Outer Banks of North Carolina. I'm not really sure how regulating spyware and adware can be categorized as a "trade infringement" when legislation is proposed.

I have been overwhelmed with pleas from my customers for answers. They are confused and frustrated. These pop-ups consume system resources to such an extent that computers lock-up and freeze.

These people are victims and need to be protected. Penalties exist concerning viruses and spam.

Tank you,

F. G. Croswait
